

SAEGIS™

WHAT DOES SAEGIS™ MEAN FOR YOU?

SAEGIS is the leading online trademark screening solution.

It offers powerful tools for tailored (Custom Search), automated (AutoScreen) or worldwide (ISS) trademark screenings.

SUPPORT AND TRAINING

We are committed to helping you enjoy the full potential of SAEGIS. For further information or your free password, please contact our Customer Services.

WE MAKE IT EASY FOR YOU

- The SAEGIS tools technology and screening strategies are based on our expertise and experience in search intelligence.
- SAEGIS offers over 30 databases worldwide. They are updated daily, helping to ensure accurate results.
- You can combine related sources and databases, such as trademarks, domain names and pharmaceutical names in use, in one go.
- Easy-to-use sorting, filtering and exporting tools allow you to review the reports fast and efficiently.

YOUR ADVANTAGES

You call the shots: With Custom Search you can define your own screening strategy in a wide range of trademark databases and related sources.

Use our expertise: If you do not have the search expertise or time to create your own strategy, AutoScreen offers intelligent automated screening at fixed rates.

Full cost control: Your access to SAEGIS is free. And since you pay as you go, you have full control to stay inside your budget. You either only pay for the trademark details you want to see in Custom Search or choose to screen at fixed rates with AutoScreen or ISS.

Save time: No need to wait for the results. You have immediate access to the detailed world-class trademark data you are looking for .

WHAT DOES SAEGIS CONSIST OF?

Custom Search

- Quickly locate specific trademarks
- Conduct screenings with your personally set strategies
- You manage the costs: only pay for the trademarks you want to see in detail

AutoScreen

- Just enter your trademark and let AutoScreen do the rest
- Automatic screenings at fixed rates
- Get the results that best suit your trademark

ISS

- A Thomson CompuMark exclusive
- Uncovers identical and phonetically identical trademarks published for the first time since 1976. The ISS database holds over 200 countries worldwide.

| Criteria | | |
