

SAEGIS database overview

SAEGIS is the leading online trademark screening platform for global research capabilities.

Its tools **Custom Search** and **AutoScreen** cover more than 30 trademark registers worldwide for tailored or automated online trademark screening. In one go you can also search for industrial names, pharmaceutical names and (in Custom Search) domain names.

With **ISS**, a Thomson CompuMark exclusive, you can detect identical and phonetically identical marks in more than 200 countries published for the first time since 1976.

Trademark registers

Australia	Japan
Austria	Latvia
