

International Availability Searches

A comprehensive search of your proposed trademark in any of more than 200 jurisdictions. Choose individual countries/registers to search, or select a regional package based on your needs.

PRODUCT USES

Use International Availability Searches to determine whether your proposed trademark is available for use in the country, register, jurisdiction or region of your choice.

- **Assess the strength** of a trademark for acquisition or licensing purposes
- **Avoid infringement** of existing trademarks
- **Support trademark litigation** by identifying identical and similar trademarks and domain names that could bar the use or registration of a trademark

PRODUCT DETAILS

Using our unique computerized search system and proprietary trademark databases, or our network of highly qualified foreign associates, we search your proposed trademark against active trademark registrations. We report applications and, for many countries, unpublished applications (status before registration). English translations of goods and services are provided for all non-English searches.

COVERAGE / SOURCES

For a complete list of the more than 200 jurisdictions we cover, please visit our web site at <http://compumark.thomson.com> or call us at (800) 692-8833. Our International Availability Searches cover:

- **Active registrations** in the country, trademark register, or area of your choice.
- **Community Trademarks** are automatically searched when you order a search of a country that is a member of the European Union.
- **International registrations** requesting protection in the country searched are included for members of the Madrid Agreement or Madrid Protocol.
