

Pharmaceutical Services

With literally millions of pharmaceutical trademarks in use around the world, including marks not officially registered, pharmaceutical trademark research presents specialized challenges. Thomson CompuMark understands and meets these challenges with industry-leading pharmaceutical trademark research expertise, resources and coverage. We provide a full array of pharmaceutical trademark screening and clearance search services designed to help minimize your business risk.

PHARMACEUTICAL AVAILABILITY AND SCREENING SEARCHES

Pharmaceutical Expertise

Thomson CompuMark Pharmaceutical availability searches are conducted by our dedicated Pharmaceutical Research Team. These seasoned analysts have specialized training and in-depth understanding of the trademark research requirements for the pharmaceutical industry.

U.S. Pharmaceutical Availability Search

We combine Thomson CompuMark's industry-leading U.S. Availability Search with additional specialized pharmaceutical industry sources, including:

- IMS Health Pharmaceutical In-Use
- Physicians Desk Reference
- WHO and USAN stems
- National Drug Data File (includes strength, dose and type)
- American Drug Index
- Redbook (includes strength, dose and type)

U.S. Pharmaceutical Availability Search XC

The most comprehensive pharmaceutical search coverage available. This search includes all the sources in the standard U.S. Pharmaceutical Availability Search, plus the following additional sources:

- FDA Orange Book
- CenterWatch Study Results
- International Pharmaceutical Abstracts (IPA)
- National Drug Code Directory
- Pharmaceutical News Index (PNI®)
- The Health Devices Sourcebook®
- Cerner Multum Lexicon
- DIOGENES FDA Regulatory Updates
- Drug Information Fulltext (AHFS Drug Information and Handbook of Injectable Drugs)
- CenterWatch Pipeline Drugs
- EMBASE Biomedicine Database

Pharmaceutical In-Use Screening on SAEGIS™

SAEGIS online screening is the fast, convenient way to begin your evaluation for pharmaceutical marks. Develop your own tailored strategy for searching the SAEGIS Pharmaceutical In-Use database, licensed through IMS Health. Choose what you want in your report and easily export it into the report format of your choice.
