

Trademark Watching Services

Trademark watching is one of the most important ways to protect your trademark's integrity and your brand. By using Thomson CompuMark's comprehensive Trademark Watching Services, you can uncover potentially conflicting marks that might be overlooked by manual trademark watching.

PRODUCT USES

Thomson CompuMark trademark watching services monitor trademark applications, publications and/or trademark use, systematically identifying exact matches and confusingly similar marks, unauthorized brand usage and infringement—notifying you when conflicting marks are identified.

PRODUCT OPTIONS

Word and Design trademarks

We alert you to trademarks that may be confusingly similar to yours, including word marks, logos and slogans. Timely reports provide clear, concise information, so you can act quickly to protect your brand.

Global Coverage

We provide coverage in the U.S., and more than 200 other countries. English translations of Goods and Services for most European registers are now included automatically, at no additional cost, for all paper Watch Notices and via Watch-E Services. Translations from other countries and registers are available by request.

Web Watching Services

Our Web Monitoring Service alerts you to trademark infringement and misuse on the Web. Web monitoring with Cease-and-Desist extends your coverage to include automated cease and desist functionality, plus convenient integrated WHOIS information for identified Web sites. Online Auction Monitoring Service alerts you to unauthorized, gray market or counterfeit sales of your product line.

Watch E-Services

Watch E-Services gives you a convenient way to manage your trademark watch portfolio, review watch results, and create and share reports, online. Easily monitor watched marks and verify renewal dates, classes and countries watched. A range of service options lets you choose the functions you need, including our advanced Paperless Watching.
