

# TRADEMARKSCAN® Online Databases

Provides immediate access to an unparalleled collection of global trademark records. Enhanced data and flexible search options help you easily retrieve the information you need.

## PRODUCT USES

### Screen your mark or design

Determine if your mark is available to pursue further or if it would infringe identical or similar marks.

### Trademark protection

Monitor newly filed applications and changes in status.

### Portfolio maintenance

Manage and protect global trademark portfolios.

### Competitive intelligence

Track competitors' market activities and new product introductions.

### Support trademark litigation

Identify marks that advance your position or analyze your opponent's filing activity.

## PRODUCT DETAILS

### Flexible, easy-to-use search interfaces

TRADEMARKSCAN® databases are available through SAEGIS™, Dialog® and Westlaw®, allowing you to select the search interface you prefer.

Select from two search interfaces in SAEGIS:

**AutoQuery:** Enter your proposed trademark, and let

AutoQuery's sophisticated search engine help conduct your search

**Custom Search:** Develop your own search strategy to meet your specific objectives

TRADEMARKSCAN databases are also available on SAEGIS using ISS Online and Electronic Watch.

## RELATED PRODUCTS

### U.S. Full Availability Search

Follow your screening with a comprehensive search to help determine the availability of a mark for registration in the United States.

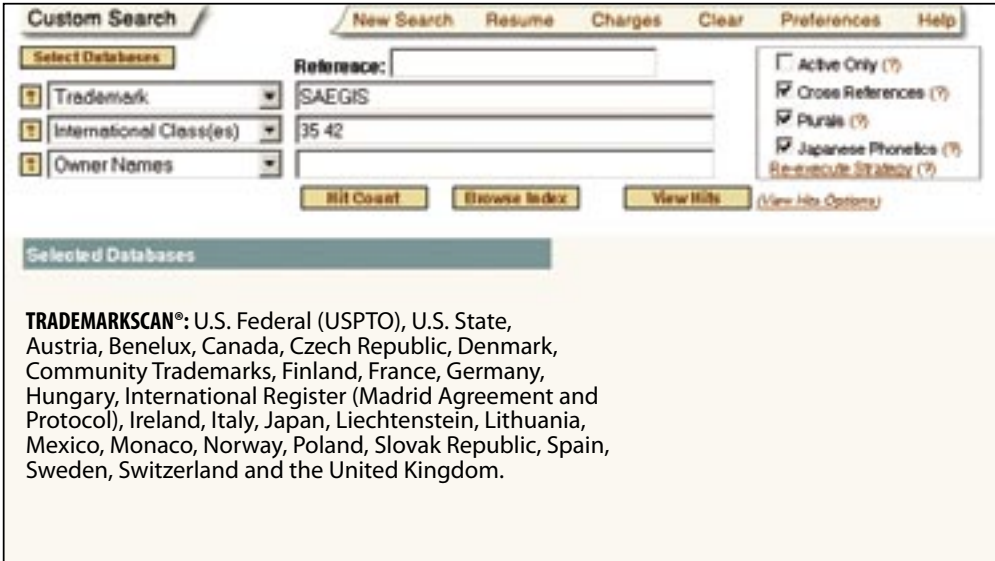

### Electronic Watch

Guard your trademark against potential infringement with Electronic Watch on SAEGIS. Build a portfolio of marks, and select the TRADEMARKSCAN databases to monitor.

### ISS Online

Screen your trademark for identical matches in up to 200 countries and trademark registers, and “click through” to view full text records in corresponding TRADEMARKSCAN databases.

**Custom Search: A powerful tool that allows you retrieve the most relevant results.**

The screenshot shows a web interface for a trademark search tool. At the top, there are navigation links: "New Search", "Resume", "Charges", "Clear", "Preferences", and "Help". Below these is a "Select Databases" section with three dropdown menus: "Trademark" (set to SAEGIS), "International Class(es)" (set to 35 42), and "Owner Names". To the right of these fields is a "Reference:" input field. Further right is a list of checkboxes for search options: "Active Only (?)" (unchecked), "Cross References (?)" (checked), "Purals (?)" (checked), "Japanese Phonetics (?)" (checked), and "Resource Status (?)" (checked). Below the checkboxes are buttons for "Hit Count", "Browse Index", and "View Hits", along with a link for "(View Info Options)".

**Selected Databases**
